

August 21, 2018

Dear valued customer,

We hereby declare that all plastic containers used by Medichin nv are suitable for pharmaceutical, supplement, HBA and food industries.

All plastic containers are manufactured in accordance with Good Manufacturing Practices. The containers are produced from materials which meet all requirements of the FDA for Olefin Polymers to be used as articles or components of articles for contact with food.

Additionally, materials used in the manufacturing of the containers comply with following EU directives:

EU Directive 2002-72-EC
EU Regulation (EU) No 10/2011
EU Directive 94-62-EC
EU Directive 2001-18-EC
EU Directive 2002-95-EC
EU Regulation (EC) No 1935/2004
EU Regulation (EC) No 2023/2006
EU Directive 78/142/EC
EC Regulation 1223/2009

No latex, latex compounds or natural rubber are intentionally added or used as an additive or raw material in the manufacturing of the containers and caps.

It should be noted that these plastics such as HDPE, LDPE and PET are not associated with phthalates including Bisphenol A. Bisphenol A is typically used as a plasticizer in rigid plastics such as PVC. It has been confirmed that phthalates or PVC are not used in production nor is added during the manufacturing process of the plastic containers and caps.

Sincerely

Medichin nv
